

Mohamed Seif El Islem Deneche

Personal

Name	Mohamed Seif El Islem Deneche
Address	Uv09 COSIDER B C04 N30 Ali Mendjeli, El Kharoub, 250000 Constantine
Phone number	+213 540659559
Email	msideneche@gmail.com
Date of birth	18-09-2003
Gender	Male
Website	https://github.com/mohameddn988
LinkedIn	https://www.linkedin.com/in/mohamed-deneche/

Work experience

Full Stack Developer

Jul 2025 - Present

Progix, Montreal, QC, Canada (Remote from Algeria)

- Develop and maintain 8+ full stack applications using **Node.js**, **Express**, **React**, **Next.js**, and **Tailwind CSS**.
- Designed and optimized **relational and non-relational databases** (**PostgreSQL**, **MongoDB**, **SQLite**) for apps handling **up to 5,000+ monthly users**, improving query performance by **30%**.
- Build and consume **Restful APIs** and integrate third-party services (**Stripe**, **Auth0**, **external APIs**).
- Configured and maintained **DNS**, **SSL**, and **hosting environments** on **Render**, **Vercel**, and **VPS**, achieving **99.9% uptime** across multiple deployments.
- Write **unit and integration tests** and document APIs with **Swagger/Open-API**, increasing code coverage to **85%**.
- Collaborated closely with project managers, designers, and stakeholders across **4-6 concurrent projects**, ensuring on-time delivery of scalable, client-focused solutions.
- Improve performance and user experience with responsive design and front end optimization reducing **page load times by 25%**.

Education and Qualifications

Master's Degree in IT Systems and Decision

Sep 2024 - Jun 2026

University Badji Mokhtar, Annaba, Algeria

Currently pursuing advanced studies in **information systems**, **decision support**, and **intelligent systems**, with coursework focused on:

- **Algorithmic complexity and problem solving techniques**
- **Advanced Java programming**
- **Service-Oriented Architectures**: including **SOAP/Restful API design**, **orchestration**, and **choreography**
- **Machine Learning and Deep Learning**: classification methods, neural networks, and decision models
- **Cloud computing and peer-to-peer architectures**
- **Information theory and modeling & optimization techniques**
- **Advanced database systems**: semi-structured data, **SQL** and **No SQL** technologies

Developing analytical and engineering skills for designing intelligent, distributed, and data-driven decision-making systems.

University Badji Mokhtar, Annaba, Algeria

- Completed a comprehensive curriculum covering **algorithms and data structures, computer architecture, graph theory, information systems, database systems, operating systems, compiler theory, object-oriented programming, software engineering, web development, computer networks, fundamentals of AI and cybersecurity, mobile development, and semi-structured data.**
- **Developed a Travel Agency Web Application** as a second-year mini project using **HTML, CSS, JavaScript, PHP, XAMPP, and SQL**, applying full stack development fundamentals.
- **Built a PaaS platform for dental clinics** as a graduation project, designed as a **startup prototype** using **React, Express, and PostgreSQL**, following modern web architecture principles.
- Proficient in a wide range of programming languages and tools: **C, Python, SQL, PostgreSQL, Assembly, Java, HTML/CSS/JS/PHP, Flutter, SWI-Prolog, XML, React, Express, Qt Creator, Modelio, Cisco Packet Tracer.**
- Active member of the **Computer Science Club**, serving as **club leader for one year** : led technical initiatives, helped maintain university lab computers, and contributed to organizing institutional events.

Interests

Competitive programming and algorithm challenges, Open-source contributions and side projects, Volunteering at university events, Teaching students programming languages and basic computer science concepts, Providing programming and CS support to incoming university students

Skills

- **Programming Languages:** C, Python, Java, JavaScript, SQL, Assembly, PHP, Prolog, XML
- **Web & App Development:** React, Express.js, Node.js, Flutter, HTML5, CSS3, Qt Creator
- **Databases:** PostgreSQL, XAMPP (MySQL), MongoDB, Semi-structured data (XML, JSON)
- **Machine Learning & AI:** Deep Learning (basics), Classification methods, NumPy, foundational ML concepts
- **Cloud & DevOps:** Cloud computing concepts, VPS hosting (Hostinger), Render, Vercel, DNS & SSL configuration, CI/CD fundamentals
- **Tools & Other Skills:** Modelio, Cisco Packet Tracer, Git/GitHub, Swagger/OpenAPI, Algorithmic problem solving, Software architecture, Teaching & mentoring first-year students
